

# St Thomas More

## School Grounds Project 26/03/2008

Kent Wildlife Trust were asked to help with the removal of an overgrown hedge and trees from around an old swimming pool, so that a new wildlife garden can be created.

**Before:** The overgrown hedge.

**After:** Once the hedge had been removed we built a new dead hedge from the leftover material.

**Some fun in-between:** Some of the trees were cut into logs for use in habitat piles.
